Direct PC TV Review

[Direct PCTV](#) comes with a whopping 9000+ channels, most of which have good video quality, and it has a reasonable price tag of \$39.95 (one-time payment).

Although I do highly recommend the [Direct PC TV](#) software, I would suggest that you also check out the [ISoftwareTV program](#). [ISoftwareTV](#) costs less than [Direct PCTV](#), although it has "only" 3000+ channels. If, like me, you feel that 3000+ channels is more than enough for you to watch, then save your money and get [ISoftware TV](#) instead.

However, if having lots of channels appeals to you, then go right ahead and give [Direct PCTV](#) and all of its 9000+ channels a try - after all, it only costs \$5 more than [ISoftwareTV](#), and you'd be getting 6000+ more channels for the extra \$5.

All in all, [Direct PC TV](#) is highly recommended, with its low price, good video quality, and huge number of channels. [Click Here to check out Direct PCTV right now](#). (But don't forget to also check out [ISoftwareTV](#) which is \$5 cheaper - see which one you prefer.)
