# Satellite TV for PC Elite Edition Reviewed

This is the second highest priced option of the "Satellite TV for PC" software series produced by SatelliteSoft. At \$49.95 (one-time payment), [Satellite TV for PC Elite](#) allows you to watch 3000+ tv channels on your pc or laptop. This version costs \$10 more than the [Professional Edition](#) but only gives you around 200 channels more (the professional edition has 2800+ channels compared to its 3000+). To me the extra 200 channels doesn't justify paying the extra \$10 but you may disagree. I would sooner recommend [Direct PC TV](#), which has 6000+ more channels (with 9000+ channels) and costs \$10 less (\$39.95).

I give the [Satellite TV for PC Elite Edition](#) a ranking of 4. [Click here to see the #1 ranking software instead.](#)
