Satellite TV for PC 2009 Titanium Edition Reviewed

This is the highest-priced option of the "Satellite TV for PC" software series produced by SatelliteSoft. At \$99.95 (one-time payment), [Satellite TV for PC Titanium Edition](#) allows you to watch 4000+ tv channels on your pc or laptop. Although the video graphics quality is OK, this software is definitely not my first choice. You can get much better value for a much lighter price tag - for example [Direct PC TV](#) has 5000+ more channels (9000+ channels in total!) and only costs \$39.95 - that's \$60 cheaper!!

Due to this relative lack of value, I give the [Satellite TV for PC Titanium Edition](#) a ranking of 5. [Click here to see the #1 ranking software instead.](#)
